

IMC GROUP CONSULTING LIMITED

PRESS RELEASE

From 1 September, IMC Group Consulting Limited will change its name to DMT Consulting Limited

From 1st September 2014, IMC Group Consulting Limited (IMC) will trade under the name DMT Consulting Limited. IMC, together with other group consulting companies, form the International Mining Consulting Division of the holding company DMT GmbH & Co. KG., based in Essen, Germany.

IMC has been part of the DMT Group since 2006 and has played a major role in the development of DMT's International Mining Consulting activities. The group has expanded from its bases in Europe and established mining consulting companies in Russia, India, Indonesia and South Africa, as well as representative offices in Peru, Turkey and Bangladesh and a partnership arrangement in Mongolia.

"As DMT's International Mining Consulting Division has expanded and will continue to expand, we consider it timely and strategic to integrate into one group and operate under one brand name", says Managing Director Chris Wells. "DMT Consulting Limited, which will also incorporate our network of offices around the world, will continue to provide the mining industry with market-leading mining consultancy services. The integration of the Group will also provide ready access to a larger number of highly trained professional staff, additional services and greater local presence in more countries worldwide."

IMC, which was inaugurated in 1947, is recognised as a world leading provider of multi-disciplinary engineering for all stages of mine development and operation throughout the mining life cycle. IMC also specialises in providing independent technical assessments, including valuations and due diligence for mergers and acquisitions and support for stock exchange listings. IMC's experience covers virtually the entire spectrum of mined commodities and geographic regimes.

DMT was founded in 1990 by the merger of three German engineering companies whose roots extend back to 1737. The DMT group operates worldwide, with a workforce of around 1,000, offering services to the Mining sector, as well as Mechanical and Plant Engineering and assistance to the Oil and Gas, Civil Engineering and Infrastructure industries. DMT's mining consultancy services notably include state-of-the-art expertise in underground mine planning, especially shaft sinking, mine gas ventilation technology, rock mechanics and mineral processing, whilst other sections of DMT offer mineral exploration services.

Under our new name, DMT Consulting Limited will continue to provide the same world-class, professional consulting services that are synonymous with the IMC brand, but with the addition of specialist mining engineering capabilities of DMT in Germany as well as greater local presence through an extended network of international offices. In other respects, the Company's registration, its executives, office addresses, staff and track record will remain unchanged.

Details of the principal consulting offices in the DMT Group and a short description of DMT Consulting Ltd and its capabilities are provided below.

Pure Offices, Lake View Drive, Sherwood Park, Nottingham NG15 0DT, UK. Tel: +44 (0)1623 726166;

IMC GROUP CONSULTING LIMITED

ABOUT THE INTERNATIONAL MINING CONSULTING DIVISION OF DMT

The International Mining Consulting Division of DMT consults to major mining companies, junior mining and exploration companies, financial institutions, governments, law firms, insurance companies and individual investors on all technical aspects of mining, including project evaluation, mine planning and development and operations. Professional staff include Senior Geologists, Mining Engineers, Metallurgists, Geotechnical Engineers, Environmental Specialists, Contract/Procurement Specialists; Mechanical, Electrical and Infrastructure Engineers all with extensive experience in the mining and exploration industries.

Capabilities include:

- Mineral resource/reserve estimates and audits, compliant with all worldwide reporting codes
- Mine design, infrastructure and engineering (surface and underground mines);
- Metallurgical assessment and process flowsheet development
- Preliminary economic assessments, scoping, prefeasibility, and feasibility studies and detailed engineering
- Estimation of project capital and operating costs; project financial modelling and analysis
- Valuation of mineral properties
- Geology and exploration assistance
- Shaft engineering and mine ventilation
- Independent due diligence reviews of mining/ exploration projects for M&A / divestments
- Reporting for public disclosure, including NI43-101 Technical Reports, Competent Persons Reports (CPR), and Mineral Expert Reports (MER)
- Lender advisory services, including Lender's Engineer
- Operational support, including Owner's Engineer and training
- QA/QC audits and reporting
- Operations benchmarking, optimisation studies and debottlenecking
- Market surveys and economics
- Environment, Mine Health and Safety
- Expert witness services
- Project Management, Construction Supervision and EPCM
