GLOBAL SERVICES TO THE MINING AND ENERGY INDUSTRIES

IMC Group Consulting Limited is an international consultancy offering a broad spectrum of services in the mining, minerals, engineering, environmental and energy industries world wide. IMC has been in continuous existence since the date of its incorporation in 1947 and is recognised as a world leader in its field. IMC has worked in more than 150 countries, and undertakes assignments in over 25 countries in a typical year.

In 2006 IMC Group Consulting Ltd. was purchased by DMT GmbH of Germany and has been merged with DMT Montan Consulting.

IMC's typical clients include a range of merchant banks, private mining companies, aid agencies, international government bodies, lawyers, insurers and major financing institutions such as the World Bank, DFID, TACIS, UN, PHARE, ADB, EBRD and NGO's. IMC undertakes competent person's reports, due diligence, financial analyses, bankable documents, supports to investors, institutional strengthening, mineral exploration, mining engineering, geological and environmental remediation projects at all levels from very small operations through to multidisciplinary and multinational operations in developing countries, and in the developed world.

IMC's headquarters are in Nottinghamshire, UK with other offices in London and Essen and associate companies in Russia and South Africa. Our teams are highly decentralised through a network of main project offices, several operating on a number of assignments. IMC also forms collaboration with local companies in countries where work volumes have reached critical mass and offers economic advantage to our clients.

IMC Expertise lies in the following areas:

- » International Investor Support - CPR, Due Diligence & Valuations
- » Strategic Development & Restructuring
- » Exploration, Resource Modelling & Earth Sciences
- » Project Management, Feasibility & Design
- » Environmental Impact Assessment & Management Systems
- » Procurement, Project Implementation & Operational Assistance
- » Metal & Mineral Processing
- » Mine Safety & Training
- » Research & Development
